

Client management before and after release

The project goal:

Client-centered HIV prevention activities aimed at controlling and reducing behavioral risks in respect of HIV infection and tuberculosis among ex-prisoners.

The project target group is the prisoners and former prisoners, where priority is given to the representatives of the following groups: people living with HIV, injecting drug users, TB patients, who have no place of residence after the release, have no documents, have need of the social, medical and legal support.

Operation procedure:

Evaluation of needs and requirements, contract conclusion, assistance in addressing social, legal and medical issues, as well as HIV, STI and TB detection.

Depending on the complexity of the addressed problems the program provides three options to the clients:

- ***Adaptation with elements of rehabilitation from drug addiction in Ranar Halfway House.***
- ***Social adaptation with elements of employment in "Phoenix" Social hostel.***
- ***Outpatient passing of the case management program within the framework of the HIV and TB prevention.***

«Phoenix hostel»

- *Addressing problems with local municipal statement of residence and temporary registration in the Penal Inspectorate and provision of access to medical and diagnostic services for clients on HIV and TB issues, who have no place of residence and documents.*
- *Involvement of clients for the classes in the workshop on the hostel basis (component of social skills acquirement and employment).*

Services provided by “Phoenix” hostel:

- **Accommodation**
- **Meals**
- **Domestic services**
- **Acquirement of social and work skills**
- **Assistance and consulting on the matters of document reissuance and employment.**
- **Humanitarian aid (clothing)**

Period of stay in a hostel: 30 days; number of beds: 10 - 11.

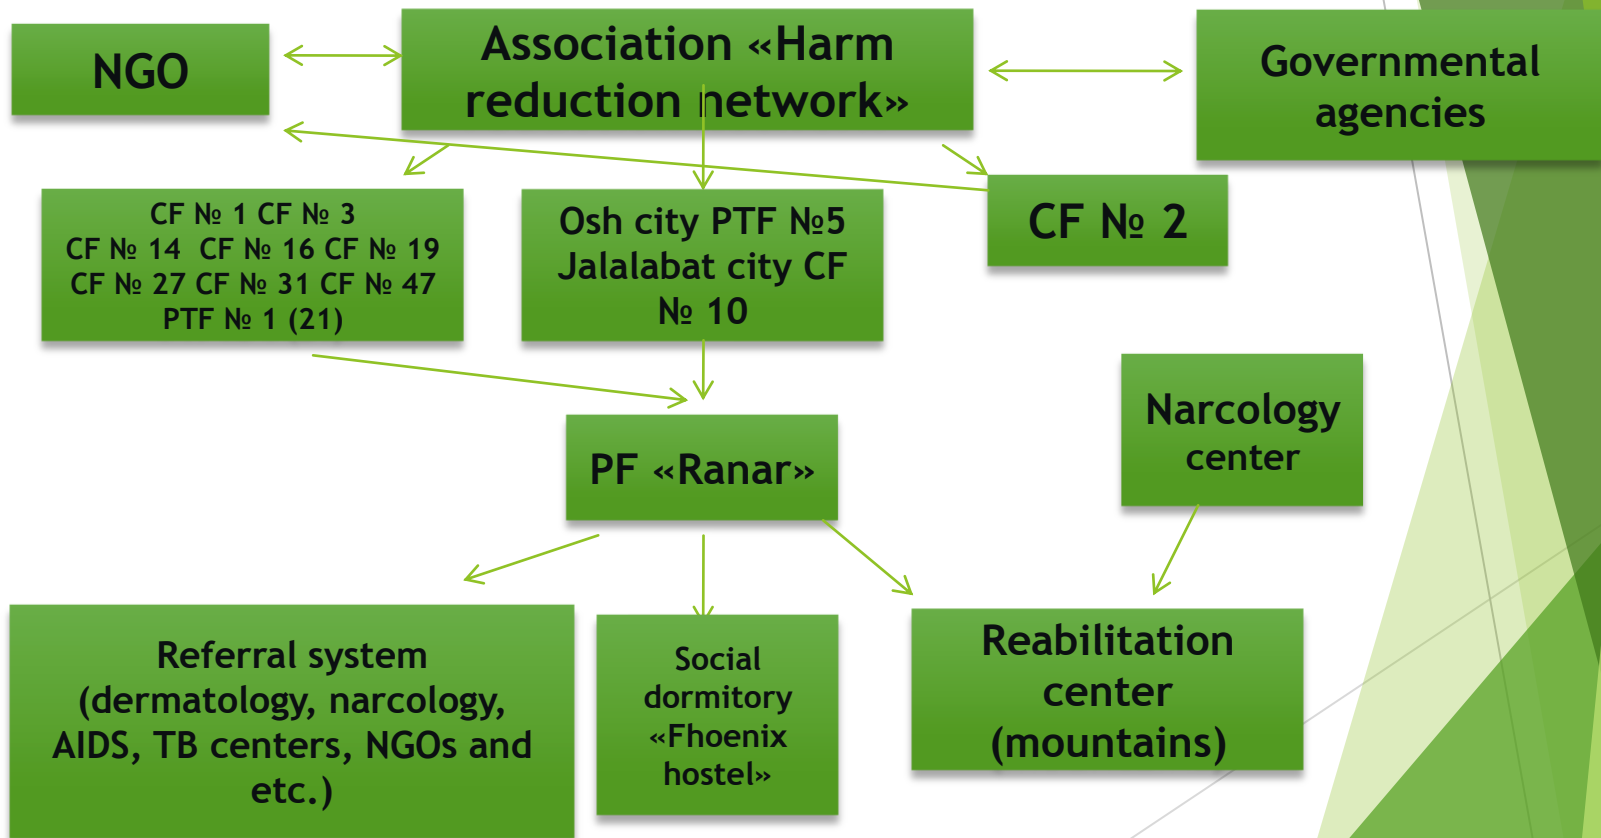

The **“START”** client management program is implemented on the basis of Social Bureaus in **11 Correctional facilities and 2 pre-trial detention facilities**

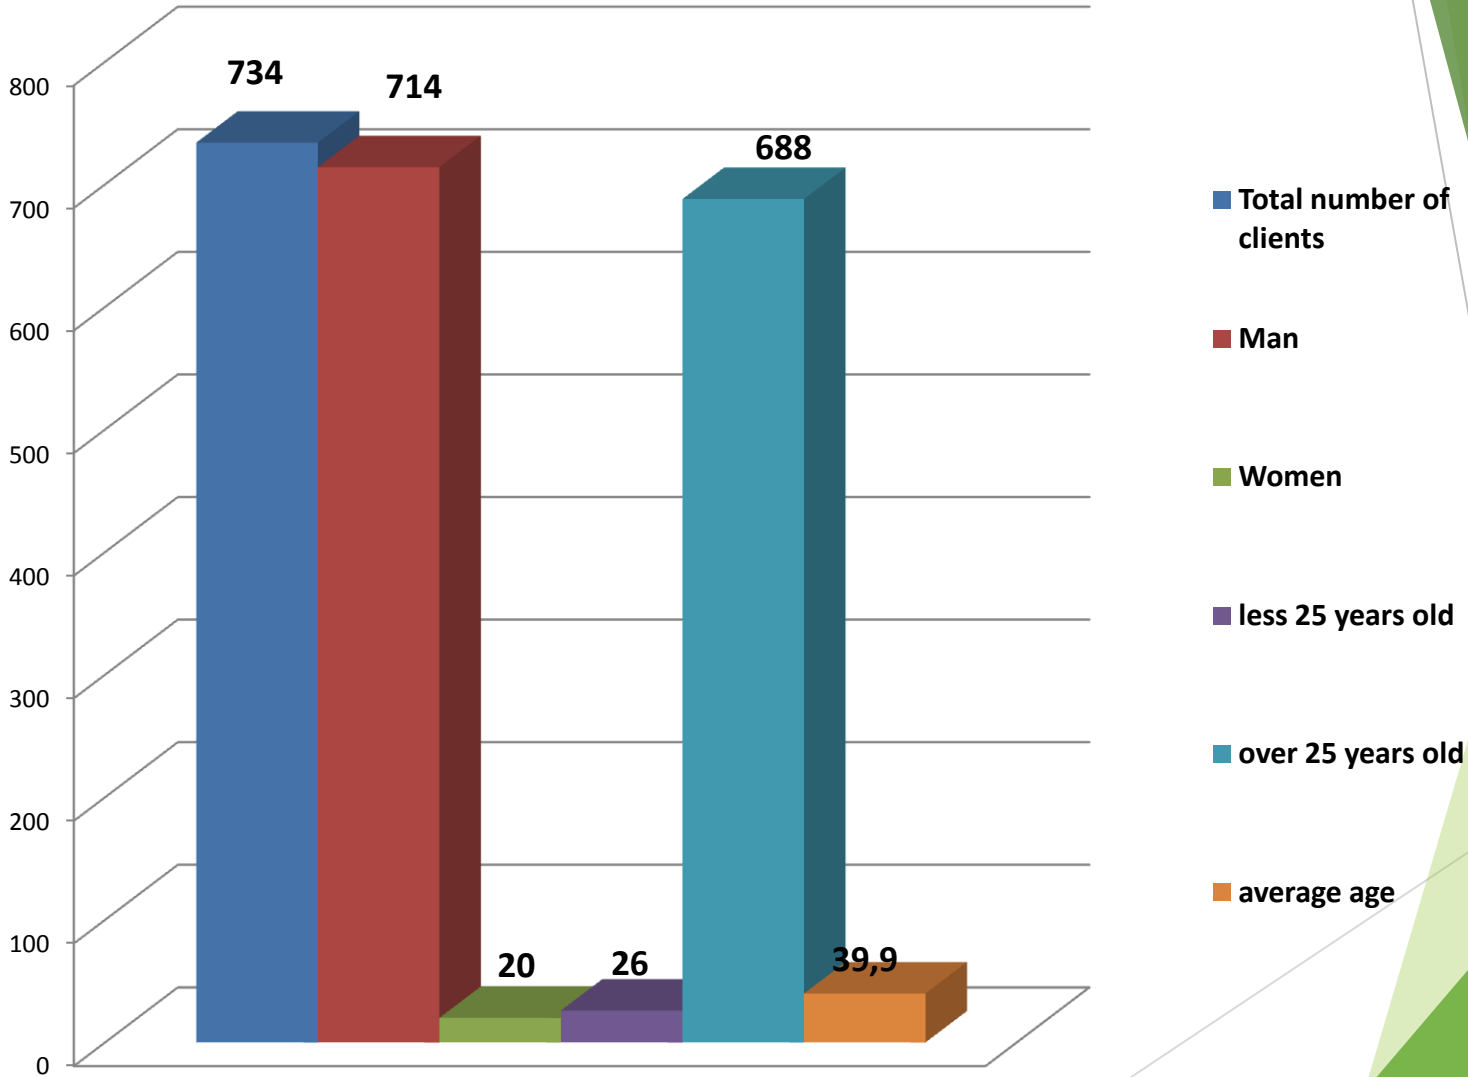

The feature of this program is that the work in the correctional facility for 2 months prior to release and 3 months after release will be carried out by **the same specialists.**

The entire program will consist of 6 sessions, aimed at preventing and addressing the package of **social, legal and medical** problems of the client.
